

ETP Resources Announces Changes to the ETP Taxonomy

FOR IMMEDIATE RELEASE

DUBLIN, OHIO – February 26, 2016 – ETP Resources, LLC announced today changes to the ETP Taxonomy[®]. The changes to the ETP Taxonomy[®] include the addition of Exchange-Traded Managed Fund Shares, to coincide with today's launch of Eaton Vance's NextShares, as well as the removal of security types no longer being traded on U.S. securities exchanges. The updated ETP Taxonomy[®] is available at www.etpresources.com.

The ETP Taxonomy[®] is a classification system that offers unprecedented transparency for a number of confusing exchange-traded security types listed in the United States often referred to as ETFs, ETVs, ETNs, etc. It was developed by ETP Resources, a financial information services company specializing in U.S.-listed exchange-traded products, to improve upon currently available reference data sources and provide data solutions for securities master databases.

ABOUT ETP RESOURCES, LLC

ETP Resources, LLC is a privately held, financial information services company based in Dublin, Ohio. The company provides reference data, data solutions, and management consulting services to the financial services industry specializing in U.S.-listed exchange-traded products. James Simpson founded the company in 2009 after working in the American Stock Exchange's ETF Marketplace, Amex Regulation, and achieving several milestones developing exchange-traded products.
